

GRAVITY JUNK BASKET

Riser Cleaning Debris Catch Tool

HAMDEEN

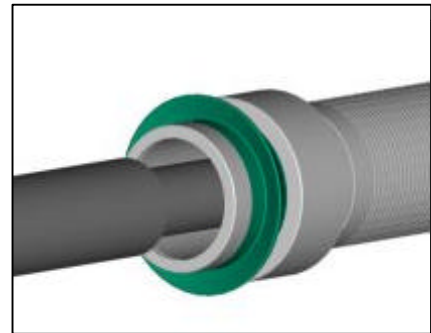

©2003

Description

The Gravity Junk Basket is a downhole tool used when cleaning/jetting the riser and BOPs on a semi-submersible offshore rig. The tool is placed in the string below the jetting/ cleaning assembly either during a short trip or in a dedicated BHA. The Gravity Junk Basket is spaced out to be in the first joints of casing when the BOPs are being jetted. Debris dislodged from the BOPs which is unable to be circulated out conventionally is captured and retrieved from the well using the Gravity Junk Basket.

Features

- Rubber diverter cup
- Wrapped screen filter
- Large flow area
- Large sump volume
- 360° coverage
- Easy empty feature

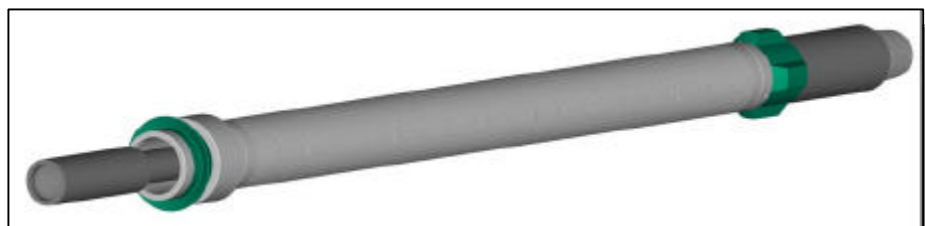

Rubber Wiper Cup

Advantages

- Prevents debris falling into the well during riser/ BOP cleaning operations
- Avoids completion packer failures and completion misruns

Properties (9⁵/₈" and 10³/₄" Casing)

- Overall length: 120" (10'-0")
- Centraliser OD: To Tubing Drift
- Connections: 3-1/2" IF Box x 4-1/2" Pin

Wrapped Screen
